github.com/blax99 Lalitpur, Nepal

SUMMARY

Final-year Computer Science and Information Technology student seeking a software development internship to apply my programming skills, gain hands-on experience, and contribute to real-world projects while learning from experienced professionals

EDUCATION

BSc. CSIT (TU Affiliated)

Mahendra Morang Adarsh Multiple Campus

2022 - 2026

- Expected

CGPA
3.2 / 4.0

PROJECTS

Task Manager App (MERN Stack)

- Built a full-stack task management app with user auth, CRUD operations, and a REST API
- Frontend in React with Context API for state management; backend in Node.js/Express with MongoDB

Virtual Assistant (MERN Stack)

- Developed a web-based virtual assistant using MongoDB, Express.js, React, and Node.js that handles user voice/text commands to perform tasks such as answering queries, automating actions, and providing an interactive conversational interface

AES Encryption based Image Steganography (Django)

- Image Steganography Application Developed an AES encryption-based image steganography application to securely hide and retrieve data within images

LANGUAGES

English
Advanced

SKILLS

Programming

JavaScript Python TypeScript

Web Development

React.js Node.js Django
Express.js HTML5 CSS3

Database

MongoDB

basic SQL (queries, relational database concepts)

Version Control

Git GitHub

Testing & Debugging

Experience identifying issues and debugging full-stack applications

Other

REST APIs Agile basics

willingness to learn ERP/finance-related software
